

RSA-TALKE breaks ground for integrated chemicals facility in Dubai

- 1,800 TEU ISO tank storage capacity in Jebel Ali Free Zone
- Services for non-hazardous and hazardous liquid chemicals of DG classes 3, 4, 5, 6, 8 and 9
- Value-added services include warehousing, drumming and ISO tank cleaning, inspection and approval
- RSA-TALKE completes range of specialised logistics services for customers of the chemical and petrochemical industries

Dubai (UAE), 30. August 2015. The chemical logistics joint venture RSA-TALKE has broken ground for its new integrated chemicals facility. The multi-service site is designed for the handling of liquid chemicals, with ISO tank containers as the central element and will have a capacity of 1,800 TEU. It is located in Jebel Ali Free Zone, close to Dubai World Central where the company already operates two specialised warehouses for hazardous and non-hazardous chemical and petrochemical products.

Breaking ground for the first integrated chemicals logistics facility in Dubai (fltr.): Tariq Bin Ghalaita VP Europe & UAE Region, Sales JAFZA, Abhishek Ajay Shah, Director at RSA & RSA-TALKE, Talal Al Hashimi, COO JAFZA, Alfred Talke, Group Managing Director TALKE, Ajay Indravaddan Shah, CEO RSA Logistics and Abdulla Bin Damithan, Director Commercial Department DP World

The full-service facility specialises in the storage and handling of liquid chemicals in ISO tank containers. It is designed for both non-hazardous products and dangerous goods classes 3, 4, 5, 6, 8 and 9 and complies with the highest safety, environmental protection and quality standards.

In addition, RSA-TALKE offers the filling and re-filling of these products into IBCs or drums. The range of services also includes cleaning, inspection

and approval of ISO tank containers.

The facility also entails additional warehouses, bringing RSA-TALKE's total capacity for the storage of packed non-hazardous and hazardous chemical products to around 39,000 pallet spaces. The construction of this ISO tank facility completes the company's portfolio of chemicals logistics in the region.

To the editors

RSA-TALKE was established 2013 as a joint venture between Dubai based **RSA Logistics** and the German **TALKE-Group**. The joint venture's objective is to provide customers of the chemical and petrochemical industry in the United Arab Emirates with a full range of safe and reliable specialist logistics.

In early 2015, RSA-TALKE Dubai successfully completed a Gulf SQAS warehouse pilot assessment. As one of three participants, the company is a forerunner in implementing the GPCA's SQAS system to improve its own high standards in health, safety, security, environmental and quality – HSSEQ.
